**New Hampshire**

February 15, 1913 to February 15, 1914

# ANNUAL REPORT

OF THE

# Selectmem, Treasurer

Road Agents, School Board, and other Officers of the Town and School Districts

OF THE

# TOWN OF TILTON

## NEW HAMPSHIRE

FOR THE

Financial Year Ending Feb. 15, 1914

ALSO

Vital Statistics for the Year Ending Dec. 31, 1913

TILTON, N. H.
W. R. MORRISON PRINT
1914

8th. To see if the town will vote to exempt from taxation for a term of ten years the manufacturing establishment of the Arthur S. Brown Mfg. Company, proposed to be erected and put in operation in said town, and the capital to be used in operating the same, viz.: the new machinery, stock in trade, raw, wrought and in process, and new buildings and additions and improvements on existing buildings. (By request.)

9th. To see how much money the town will vote to raise for all purposes for the year ensuing.

10th. To see what action the town will vote to take in regard to the reports of its officers and agents for the past year.

11th. To choose all other officers and agents for the year ensuing.

12th. To transact any other business that may legally come before said meeting.

Given under our hands and seal this twenty-first day of February, 1914.

HARRIS A. MORSE,
E. W. SANBORN,
} Selectmen of Tilton.

HARRIS A. MORSE, Auditor.

Feb. 24, 1914.

# Report of Superintendent of Schools

To the School Boards of Tilton Town and Union Districts:

I submit herein my fourth annual report as superintendent of schools, it being the seventh in the series of such reports for the Town district, and the sixth for the Union district.

Besides the usual work for schools I have devoted as much time as possible, since the close of the fall term, to organizing the work in the office. It is necessary to keep in hand a great variety of accounts, lists, records, and documents, a variety so great that it would be impossible to enumerate them. The thousands of facts included are available if they are arranged systematically, and often completely lost without system. A vertical filing cabinet, with accompanying card catalogs, installed during the year, is a great aid to efficiency. A record of great importance is that of every child, giving the entire school history, promotions, teachers, attendance, rank in various studies, health, conduct, effort, etc., preserved upon a system of cards and sheets on file in the superintendent's office. These are useful, not only as a history of the individual and of the school system, but as material for studies of the greatest practical importance in education.

The legislature, at its last session, passed a law giving school districts authority to adopt a form of medical inspection for the schools. It is an important question for every district to raise, whether it wishes to take advantage of this act. We have not yet fully awakened to the overwhelming importance of safeguarding and improving the

child's health. It is certain that in the future this will be the chief concern of the school. It may be said, in explanation of this act, that it does not contemplate free treatment of pupils, but a regular examination, at least once a year, of each child, for the purpose of discovering any conditions which tend to handicap him in his work in school, or to threaten his health and well-being. If such conditions are found they are reported to the parents for treatment.

Owing to the increased valuation and lowered tax rate of the Tilton districts the aid received from the state for high school and academy tuition has been very much reduced. A still further reduction may be expected, inasmuch as the five year average of total taxation, upon which the amount of aid is based, will tend to decrease for several years.

The no-school signal now applies to the schools of both Tilton districts. The time for the signal is 8 o'clock, for no school in the forenoon, and 12.35 for no school in the afternoon. In case the schools are in session in the forenoon the afternoon signal is given at 11 o'clock, as a notice to parents that children will not be home until after 1 o'clock. Parents should not rely upon this signal solely in deciding whether the weather is suitable for attendance of their children. There are many children who, by reason of location, health, or tender years, should be kept at home when it is perfectly safe for the great majority to attend, and each home should decide wisely for itself. The decision as to the no-school signal is a difficult one, and it is impossible not to seem unreasonable, either in closing, or not closing the schools, to people who have not the whole situation in mind. It is the intention to give the signal only when weather conditions are so severe that health will be endangered by cold or wet, even when reasonable protection is provided.

## TOWN DISTRICT

The event of the year is the remodelling of the Number Four school-house. The lot has been graded to the level of the street, the house turned around and brought forward, and a light, airy basement, with concrete walls and floor, built beneath. The old out-building has been removed, furnace and water-closets installed in the basement, and an addition made to the front, giving cloak room and room for storing books and supplies owned by the district. These changes have transformed a really disreputable schoolhouse into a model building, with every needed convenience within, and a large playground outside. This completes the list of houses needing change, and we now have four admirable buildings, of which the district may well be proud. A slight expenditure each year for minor repairs should keep them in perfect conditon.

An outfit for cooking warm dinners, and incidentally training in good home-making, has been furnisned the Number Four school, similar to that bought two years ago for the Highlands and the Sanborn Road schools. The children have used this outfit with the greatest enthusiasm, and we have been able, through its use, to realize our ideal of education through doing.

Fire extinguishers have been furnished all the schools. These should be effective in subduing any small fire in its beginnings, and nearly all fires have small beginnings.

The district has been fortunate in retaining, in the Number Four and Highlands, trained teachers for three years. Miss Pettengill, at the close of the school year, went from the Sanborn Road school to Charlestown, and Miss Gamsby, who had had a previous successful experience in the same school, returned to take her place. Miss Currier was elected to a position in the Union School, and Miss Pike was

elected to the position at the Lochmere School, coming from a long and successful experience in Penacook.

A considerable addition has been made to the school library in the Lochmere school, with funds raised by the children. This is an effort which should be encouraged everywhere, for no adequate training in reading can be gained from the school readers alone, and many more volumes of interesting literature are needed.

## UNION DISTRICT

The following changes have taken place in the teaching force. Miss Crockett left at the close of the winter term, after a long and successful experience as teacher of the youngest pupils. Her place was given to Miss Rand, the building assistant, and the latter's place filled by Ellen M. Quimby. Miss Quimby declined a permanent position for the new year, and Miss Marguerite W. Stoddard was made building assistant. Miss Moore left at the end of the year to enter normal school, and Miss Lillian B. Currier was selected to take her place.

The time of the assistant has been fully occupied in helping the overcrowded first and fourth grade rooms, and in the eighth grade during the absence of the principal while teaching manual training. The work with small groups of backward children, for which the assistant was originally employed, has been impossible, and this lack has been made good by the employment of Seminary seniors who are preparing to teach, several of whom have given short periods of service daily.

One of the accepted tests of efficiency in a school system is its ability to carry on its pupils from year to year, without undue retardation. According to the returns asked for by the United States Commissioner of Education, pupils who are over eight years of age upon entering the first

grade, etc., are reckoned belated pupils. According to this standard the Union School has but 5 per cent of belated pupils. Of these, nearly half have come from other school systems. Deducting these pupils, for whose delay the Union School is in no way responsible, there remains only the small number who would naturally make slower progress through the school than the normal pupil. The problem of retardation does not exist for the Union school. This is a showing, it may be said, highly creditable to the school.

The School Savings Bank had just been started at the time of my last report. The statistics up to date are as follows:

Number depositors, 205
Total deposits, $262.17
Withdrawn for deposit in Iona Savings Bank, $147.51
Withdrawn for spending, $75.46
Balance in school bank, $39.20
Number new accounts in Iona Savings Bank, 59
Number transfers to accounts already existing in Iona Savings Bank, 26

It will be seen that two-thirds of the pupils in the school have accounts with the school bank. To these should be added the large number in the upper grades who already had bank accounts when the school bank was started, and who have since deposited directly on these accounts. This is a very satisfactory showing, and the school bank, I believe, is one of the most important things ever undertaken by the school.

A lantern of high power, using the electric arc light, and capable of displaying either opaque objects or transparent slides, has recently been purchased from the Bausch & Lomb Optical Co. The Tilton Optical Co., through whom the purchase was made, in addition to the regular trade dis-

count, generously donated to the school the rheostat, a somewhat expensive instrument for transforming the electric current into a form available for use in the lantern. This lantern has already been used several times for displaying slides to pupils, and once for an evening's lecture to adults. Thanks are due Mr. E. J. Young, Mrs. A. T. Cass, and the Daughters of the American Revolution for assistance in furnishing slides. It is planned to make increasing use of the lantern in displaying post-cards, etc., for illustration in history and geography.

The evening school has been in session from Nov. 17 to Feb. 27, a period of thirteen weeks. The courses offered are arithmetic, penmanship, civics, spelling, reading and English. Instruction has been largely individual, and the aim has been to make the courses thoroughly practical by adapting them to the needs of those in attendance. The total enrollment of twelve is much smaller than that of last year, but every member has been much in earnest in improving the advantages offered by the school, and some excellent work has been done. The record of 91 per cent in attendance is an excellent one, and a difficult record to attain by persons who work hard during the day. I should strongly advise a continuation of the evening school another year.

Respectfully submitted,

CHARLES A. BRECK, Superintendent.

## Statistics for School Year, 1913-1914

| Schools | Teachers | Number of weeks | Average membership | Average attendance | Per cent of attendance | Cases of tardiness | Visits of Superintend't | Visits of School Board | Visits of others | Pupils not tardy or absent |
